Oval wooden canopy with 1 central hole and 2 side holes for string light cable and Filé system. Made in Italy

Finish: Black

Description

Designed to create unique wall or ceiling decorations, Filé is Creative-Cables' system for expertly handling string light cables.

This oval wooden rose window with 2 side holes can be used as a starting point to create wall or ceiling lighting compositions. Thanks to the central hole you can add a wall light or a single pendant to your installation, completing it with an exposed light bulb or a lampshade according to your taste.

Matched with other components within the Filé system (wall fairlead, lampholder and terminal block) allows you to create unique solutions to illuminate your interiors

Each component is Made in Italy with poplar wood. Paint, varnish or leave the natural wood to suit your needs and creative projects.

Choose the finish that best suits your needs: the black and white coatings will allow you to create a minimal look, while the natural version will be perfect for more Scandinavian inspirations.
