

Reference: TLCAT03
EAN13: 8057730898355

Wooden terminal block for string light cable and Filé system. Made in Italy
Finish: Black

Description

Designed to create unique wall or ceiling decorations, Filé is Creative-Cables' system for expertly handling string light cables.

Match the wooden terminal block with other products from the Filé system: a wall fairlead, a lamp holder and a canopy. All components are Italian made.

Choose the finish that best suits your needs: the black and white coatings will allow you to create a minimal look, while the natural version will be perfect for more Scandinavian inspirations.

The kit includes a wooden terminal block of 50 mm diameter with a 20 mm hole, a dowel with screw for ceiling or wall fastening.
