Wooden lamp holder E27 Kit with concealed cable clamp

Finish: Neutral

Description

The wooden lamp holder E27 kit with hidden cable clamp is used to assemble a wall, ceiling or table lamp with a round or braided textile cable. This solution consists of a lamp holder E27 for a naked bulb, which is completely concealed by the wooden cover and a concealed cable clamp.

The lamp holder is made of wood crafted in Italy: very bright in the natural finishing, which can be painted as desired, extremely elegant when dark, in the wenge-effect finishing, characterised by particularly decorative purple veins.

The extra idea:

- combine the wooden lamp holder with a ceiling rose in the same finishing and complete your installation with a contrasting coloured cable or in a natural finishing if you prefer a harmonious effect.
