LED Smoky Magnetic Light Bulb Deco Line Edison ST64 2,2W 60Lm E27 1800K - F03

Description

The F03 LED light bulb combines the classic elegance of the ST64 shape with a surprising twist: a straight and vertical filament that, as the bulb is shaken, detaches from one side and rests on the glass, taking on ever-changing shapes.

The F03 LED light bulb has a 2.2W consumption and a brightness of 60 Lumens. With an E27 fitting and a warm light colour of 1800K, it's the ideal addition for a cosy and captivating atmosphere. The smoky glass adds a touch of sleek sophistication to the room. When switched off, the glass appears as gray and elegant, and when the lights turn on the magic begins!

Connected to the base through a magnet, the filament can be easily detached by gently shaking the bulb. As it delicately settles on the glass, it creates a continuous dance of various shapes before returning to its original position. This small feature animates the light bulb, delivering an immersive lighting experience. Enjoy a unique light display with every switch.

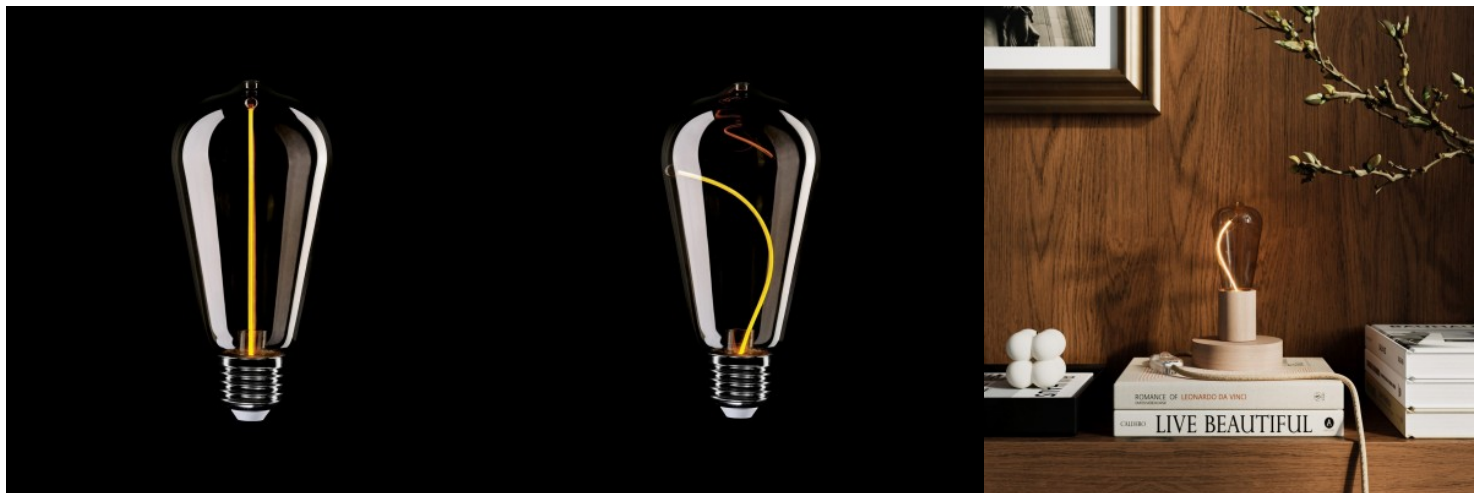

The F03 LED light bulb is so much more than a simple light source. It blends the elegance of timeless design with the innovation of the magnetic filament, resulting in a truly unique lighting experience. Moreover, with its elongated

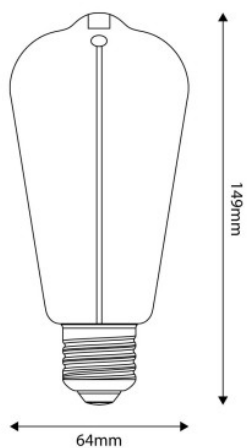

vertical filament and the light patterns, this bulb also represents a valuable design element. Whether you're looking to add striking lighting effects to your home's walls or searching for an exceptional gift, this is the perfect choice.
