Swing enamelled metal lampshade with E27 fitting

Finish: White - Black

Description

With an iconic and very simple shape, Swing is a very versatile flat concave lampshade that can be used in a variety of environments, such as kitchens, bedrooms, dining rooms or public places.

Select the finish that best suits your interior design needs: total black is perfect in minimalist environments. Versions with a shiny or satin metal outer surface will endow your indoor spaces with an industrial look, while the pastel coloured finishes, very trendy in interior design and of great aesthetic impact, will brighten even the smallest rooms. The interior surface in white enamelled metal enhances the light effect.

Due to its shape, Swing leaves in view the bulb, lamp holder and cable, allowing you to create unique combinations with components from the Creative-Cables catalogue!

The extra idea:

- Combine the Swing lampshade with a semi-threaded E27 lampholder in the same finish to create a sophisticated pendant lamp!

Attention! Bulb and lamp holder NOT included.
