Mini cylindrical 1-central-hole wooden ceiling rose kit

Finish: Neutral

Description

The 1-hole wooden mini ceiling rose kit is used to assemble a wall or ceiling lamp with a single light source. The wood, zero-km carved in Italy, is a natural material which can evoke very different styles: Scandinavian, shabby, country, nautical and many others!

The wooden ceiling rose kit is for you if:

- you need a single pendant lamp, i.e. with only one bulb
- you are looking for a natural look and feel
- you wish to impregnate or paint your rosette at will

You can match your ceiling rose kit with a lampholder kit with the same natural wood finish and a coloured, round or twisted fabric cable.
