Sarè - Wall mounting, metal cable clip for fabric cables - 2 pieces
Finish: Brushed titanium

Description

Creative-Cables was born in Turin, Piedmont, and in Piedmontese "Sarè" means to tighten, close, screw. Could there be a more suitable name for the new addition to the decentraliser range? The Sarè metal cable clip is the ideal accessory for fixing the fabric cables for the lighting solutions you have chosen for the wall or ceiling. Thanks to this tiny accessory you can create linear or creative designs with our cables and bring light to places where it is lacking.

Made of aluminium, with its distinctive embossed knurling on the cap and its small size, the Sarè decentraliser is available in all the glossy and satin metallic finishes of the Creative-Cables range of components: combine it with ceiling roses, lamp holders, cable clamps and extensions to create lamps and lighting solutions tailored to your needs and style.

Thanks to the adjustable screw catch this cable clamp is suitable to hold all diameters of 2 or 3-pole cables, both round and stranded. In its brass finish it has the elegance of a gold button: we suggest using it with Vertigo HD cables to create an original optical effect.

Warning! This product is not suitable for large section cables or nautical cords.

Pack contains 2 pieces.
