Mini cylindrical wooden 4-side- hole ceiling rose kit (junction box)
Finish: Neutral

Description

The mini 4-side-hole wooden ceiling rose kit is used to assemble a wall or ceiling lamp with four light sources.

The mini 4-side-hole wooden ceiling rose kit is for you if:

- you need a branch joint to duplicate or triple the conductor filament (unused side holes can be closed by caps included in the package)
- you want to transform a light source into a sort of "joint" on the wall or ceiling
- you are looking for a discreet solution and prefer small components
- you love a natural-looking finish

The extra idea:

- you want to enrich the route of straight-through fabric cables by means of Spotaluce

Data Sheet
