Set of 4 Cube Clip - Mini wall fixing for textile cable

Finish: Transparent

Description

Cube Clip is the ideal accessory for fixing fabric-covered electrical cables to the wall without interfering with the aesthetics of the installation.

Its minimalist design and extremely compact size make it almost imperceptible to the eye. Made of transparent polycarbonate, Cube Clip blends into the surface, allowing the cable to define the space and highlight its colors and textures.

This patented cable clip is designed for those who want clean, well-defined lighting routes, where the support remains discreet and attention is focused on the cable's path along walls and ceilings.

The closing height of the Cube Clip can be adjusted according to the diameter of the cable it is installed on, making it compatible with 2x bipolar and 3x tripolar cables.

The package contains 4 Cube Clip cable clips complete with screw and wall plug for wall fixing.

Data Sheet

Technical specifications:

Universal PC cable guide wall fixing for textile cable

Size 10x11 mm

Complete with screws and wall plugs

This product is designed for textile lighting cables 2x0,75, 3x0,75 mm and 2x18AWG, 3x18AWG

It is not suitable for large-section cables, outdoor cables, or nautical cords.

The Cube Clip cannot be used as the final ceiling fixing for a pendant light, as it is not designed to support loads or weights (lamps, light fixtures, or other suspended elements).
