Porcelain base for electrical socket and switch/diverters compatible with Creative-Tubes - from 1 to 4 outputs

Finish: Black

Outputs: 1

Description

Ideal for those who want to install or update an electrical system without major masonry work, the visible porcelain system offers a clean and minimalist design, ensuring durability and resistance. The base is compatible with the porcelain sockets and switches/dimmers signed by Creative Cables and is designed for use with Creative-Tubes, the fabric-coated flexible conduits that allow you to shape and maintain the desired shape thanks to the metallic filaments inside.

Compatible with other accessories in the Creative Cables porcelain line, such as sockets and switches/dimmers, the base is available with 1, 2, 3, or 4 outlets and stands out for its excellent aesthetic and technical characteristics. Porcelain, appreciated worldwide for its beauty and functionality, testifies to the art and skill of craftsmen who have known how to work it over the centuries, preserving its timeless charm.

The shape of the base is optimal even for walls that are not perfectly level, ensuring elegant and functional installation

in any environment. Furthermore, the wall support inside the base makes installation simple and secure.

Data Sheet

Compatible with Creative-Tubes, Ø 20mm cable glands, and with the Ø 66.5 mm junction box, sockets, diverters and porcelain Creative Cables.

Please note:

- For indoor use only
- Installation by specialized personnel

Minor imperfections are not to be attributed to a manufacturing defect, but rather are a characteristic of the product and evidence its special artisan manufacture.
