Double ferrule thermoplastic E27 lamp holder kit for lampshade with pull switch

Finish: Black

Description

A double ferrule thermoplastic E27 lamp holder kit for lampshade with pull switch is used to assemble a wall, table or ceiling lamp equipped with a lampshade.

Bakelite was named after its inventor and is a thermosetting resin that reminds us of telephones, radios and other objects from the 50s and 60s. It is a light and resistant material: if painted, it becomes very shiny! The pull switch on the lamp holder allows you to turn the light on or off, also in those cases in which there is no wall or in-line switch.

This double ferrule thermoplastic E27 lamp holder kit for lampshade with pull switch is definitely right for you if:

- you are going to shield the bulb with a lampshade
- you have no wall or in-line switch

To configure and complement your double ferrule thermoplastic E27 lamp holder kit for lampshade with pull switch:

- use the menus to define the features
- complete your lighting installation with Creative-Cables components, accessories, light bulbs and flex

A creative tip for you:

- choose a rayon cable for your bakelite lamp holder, for a shiny and glowing effect.

WARNING! Cable clamp NOT included.
