Electric cable covered in peach-coloured fabric - The Original Creative Cables, for modern and vibrant lamps - RM23

N° of cores:: 2x0.75

Description

The original Creative Cables.

For over ten years, Creative Cables have been the go-to choice worldwide for decorative lighting.

Vibrant yet soft, peach is the perfect shade for those seeking a light fitting that energises without overpowering. It pairs effortlessly with neutral tones like white, sand or anthracite, and creates striking contrasts when matched with sage green, midnight blue or brass accents - combinations that never go unnoticed.

The finish? Silky, lustrous and smooth to the touch - a refined texture that elevates the colour.

Creative Cables' fabric cables represent the very best of Made in Italy: flexible, durable, and crafted with meticulous attention to detail. With their bespoke-quality finish and the broadest colour palette on the market, they bring a unique character to every lighting project.

Data Sheet

Which finish should you choose for coloured cables - glossy, cotton or linen?

It depends on the look you're after. Cotton and linen offer a matte, natural feel - perfect alongside vintage-style fittings in brass or copper. A glossy finish, on the other hand, enhances the vibrancy of colours and works beautifully with chrome or brushed metal. Choose the one that suits your style.
