Metal Spotaluce E27 lamp holder for wall or ceiling installation

Finish: Brushed copper

Description

The Spotaluce E27 metal lamp holder is the ideal choice for bringing light exactly where it's needed, even without existing wall or ceiling outlets. Elegant in shape and essential in design, it pairs with all 2x0.75 fabric cables and the most common E27 light bulbs. Available in a wide range of colours, it easily suits any style and colour palette.

Install it on the wall or ceiling, choose the cable length, connect one or more elements in sequence, and complete your composition with the bulb of your choice: frosted for a soft glow, amber for a vintage vibe, or chrome-tipped for a bold and contemporary effect.

Perfect next to the dining table, as a reading light in the living room, or in place of a traditional bedside lamp, this lamp holder offers maximum creative freedom to design custom lighting installations that are both functional and decorative.
