LED Bulb Tattoo Dream G125 4.5W 470lm E27 2700K Dimmable

Description

Tattoo Dream is a G125 LED globe bulb from the Filotto Tattoo range, featuring a screen-printed glass with writing and graphic symbols. The decoration has a dual purpose: to improve visual comfort by reducing glare and to transform light into a narrative and expressive element.

The Dream motif was born from a collaboration with street artist Qwerty and revisits one of his works created along the Via Aurelia. The little figure with the flower becomes an invitation to dream, rendered as a graphic that interacts with light and space in a delicate and poetic way.

Tattoo Dream is designed as a decorative bulb to give as a gift or to illuminate any corner of the home, offering soft and visually comfortable light thanks to the graphic filter.

It is an LED bulb, dimmable with an E27 cap. Filotto bulbs are crafted in Italy and packaged in fully cardboard packaging, without the use of adhesives.

Data Sheet

Bulb type: LED
Shape: Globe
Cap: E27
Diameter: 125 mm
Height: 178 mm
Voltage: 220/240 V
Wattage: 4.5 W
