LED Bulb Tattoo "Turn Me On" G125 4.5W 470lm E27 2700K Dimmable

Description

Tattoo Turn Me On is a G125 LED globe bulb from the Filotto Tattoo range, featuring a partially screen-printed glass with an essential graphic inscription. The decoration is designed to improve visual comfort, reducing glare and offering a softer and more controlled light.

The inscription "Turn Me On", applied discreetly to the glass, communicates with the light creating a clean and contemporary visual effect. The result is a bulb that combines lighting function and message without being invasive.

The upper filter softens the light while maintaining uniform diffusion, suited to table lamps and pendant lights where comfortable and easily readable lighting is desired.

It is an LED bulb, dimmable with an E27 cap. Filotto bulbs are crafted in Italy and packaged in fully cardboard packaging, without the use of adhesives.
