Five-outlet Metal Clad Junction box for Creative-Tube

Description

Creative-Tubes is Creative-Cables system of fabric-covered, extremely flexible and colourful conduits, perfect for creating unique visible electrical installations.

This metal junction box can be connected to 20mm Creative-Tubes via five different outputs. Connecting Creative-Tube to the junction box is simple and can be done through the use of the (separately sold) metal terminal with M20 thread to connect each component to the Creative-Tube.

The junction box allows you to split the wires and thus create two outgoing routes to bring light into every corner of your home or workplace!

Discover the full range of accessories for Creative-Tubes to create a custom-made and unique conduits system.
