Eiva-2, 2-way outdoor lamp holder E27 and IP65 rating for Modulair System

Finish: White

Description

Eiva-2 is the 2-way waterproof, IP65-rated lamp holder from our EIVA outdoor range: the world's first wired IP65 outdoor lighting system that you can use to create customised installations for your gardens, gazebos and terraces! Thanks to the special insulating gel inside and a membrane tightly clothing the bulb, the Eiva-2 can safely withstand rain and storms.

With the 2-way Eiva-2 lamp holder you can create IP65 waterproof **customised lighting systems**. Unlike most outdoor garlands on the market, you will be free to:

- choose the number of light points you really need
- vary their distance
- match your preferred cable colour.

Thanks to the semi-threaded sleeve, the Eiva-2 is suitable for both a naked bulb and lampshade configurations.

Using the ring at the top, you can attach the Eiva-2 to any outdoor space, such as a wall, pergola or tree, and reinforce

your installation with a nylon or steel cable if necessary.

EIVA's range of uniquely coloured cables and components will allow you to create permanent outdoor installations that will decorate the environment even when the garland is off!

Eiva-2 is a product conceived, designed, manufactured and internationally patented by EIVA.

WARNING: The EIVA lamp holder is designed for glass LED light bulbs only and has been tested as compatible with the A60, ST64, G95 and G125 bulb shapes that guarantee rating of IP65 protection.
The compatibility range is being extended and is currently being tested.
