EIVA-3, 3-way outdoor IP65 snap-in joint for Modulair System

Finish: Black

Description

EIVA-3 is the IP65 T-connection of the **Modulair outdoor line**: the world's first IP65 outdoor lighting system, with which to create custom installations with the guarantee of a waterproof product. Thanks to the special insulating gel contained inside, it can safely withstand rain and thunderstorms.

Fast and easy to assemble, EIVA-3 allows you to design multiple outdoor configurations using existing connections. The assembly is snap-fit and does not require tools, so it will be easy to create pendant lights with visible bulbs or shades, or create intersections between different garlands to create a real grid of lights.

With EIVA-3, you can choose the number, distance, and length of individual drops, bringing light where you prefer and where you need it most. Moreover, through the ring on the top, you can attach the joint in any outdoor space. And with the closure cap for the side holes included in the kit, in the same color as the joint, you can also use it as a terminal.

EIVA-3 is a product conceived, designed, and manufactured by EIVA.

Data Sheet

EIVA-3, 3-way outdoor connection:

Connection device for CE 60598-1 lighting fixtures

Material: thermoplastic, pre-filled with insulating gel

Height: 115mm

Width: 75mm

Thickness: 26mm

Rated voltage: 110/250 V ac

Compatible with H05RN-F 2x1mm² cables

Class: II

Protection degree: IP65

Includes cable gland, a silicone cap for side holes, and ceiling mounting hook.

The maximum load supported by wired cables is 1.5 Kg.
