Universal wire stripper

Description

This universal wire stripper is the easy and effective tool that will help you make your lighting projects faster to complete and forget about the stress and worry of damaging cables.

Compatible with all our round, fabric-covered cables, this wire stripper features multiple blades that allow you to unsheathe, cut and strip cables in one easy step.

The blade in the middle position enables to make a clean cut (2) on the cable, by removing any excess. The knob on the top of the tool allows the blade to be adjusted to unsheathe (1), while the mirror blades on the back of the tool allow to strip (3) the cable.

The wire stripper is also equipped with a blade refill, which is located at the top of the tool.
