Linen White Melange Textile Cable - The Original Creative-Cables - TN01
braided 2x0.75mm / 3x0.75mm

N° of cores:: 3x0.75

Description

The original Creative-Cables.

Some call them colourful textile cables, others fabric covered cables, whilst others still simply call them coloured cables. But really, for over 10 years their real name has been Creative-Cables.

The beauty of the coarse linen, in different shades, makes our cables uniques.

Perfect to combine with wood and metal, they bring a touch of warmth and of nature within any environment.

The "coarse" finishing makes the electric cord a precious piece of furniture.

Data Sheet

How to choose the type of coating: Rayon, Cotton or Linen?

Many customers ask us: what is the difference between the coatings Rayon, Cotton or linen? The answer depends entirely on the type of effect you want to achieve. Cotton and Linen have a matt and natural effect; the Rayon instead enhances color brilliance.

Often it is used to combine the natural effect with vintage items such as brass, copper, iron or porcelain, while Rayon is coupled with colored metal, with chrome or satin trims.

Choose your style!
