LED Frosted White Tubular Light Bulb 4.8W 470Lm E14 2700K Dimmable - A07

Description

The satin white tubular LED bulb is designed to perfectly complement P-Light, the E14 socket lamp holder that allows you to create modern and original single or multiple drop suspensions. In addition, this bulb is perfect for small lamps and table lamps, thanks to its compact size.

The satin white finish of the glass of this bulb provides the right light to any environment without dazzling. Furthermore, the A07 has a very high color rendering index (CRI95) which allows perfect color rendering, and is dimmable, i.e. it allows you to increase or decrease the light intensity according to the need and the desired atmosphere.

Data Sheet

Bulb type: LED

Shape: T30x120
 Socket: E14
 Power: 4.8 W
 Amount of light: 470 Lumens (equivalent to an old 40 W bulb)
 Voltage: 220-240V
 Temperature: Warm light (2700K)
 Bulb life: 15,000 hours

This bulb is perfect to complete the P-Light bulb holder kit by Creative Cables.

Please note: to properly dim an LED bulb, a specific dimmer or the new generation of universal dimmers is required. You can find a selection of wall and infrared models in the dedicated section on our website.

For choosing the dimmer: in addition to the maximum power of the device, the minimum power must also be considered, as when the regulated power is lower than the minimum rating, the device may "flicker" and/or be damaged.
