Modulair Snake with Swing shade, portable outdoor lamp, 5 m textile cable, IP65 waterproof lampholder and plug

Finish: Black

Light bulb: With bulb

Description

Are you looking for a solution to illuminate your balcony? Or would you like an outdoor lamp for your garden? Modulair Snake with Swing enamelled metal lampshade is the outdoor lamp that combines practicality and design: you can finally light up your outdoor spaces with the guarantee of a Made in Italy product that is completely water resistant, forgetting the worries of rain and storms.

Modulair Snake with Swing shade is an outdoor lamp that, thanks to its 5-metre cable, lends itself easily to various uses: rolled around a tree branch or leaning against a pergola or on a terrace. Thanks to its shape, the Swing shade diffuses the light harmoniously, leaving the Modulair lamp holder visible: the world's first IP65 wired lamp holder patented by EIVA.

Modulair Snake with Swing Shade is ready to be installed: just plug it in and light up your outdoor tables! The outdoor lamp can be purchased without bulb or already complete with a decorative Edison ST64 long-filament Led

bulb.

WARNING: The Modulair lamp holder is designed for glass LED light bulbs only and has been tested as compatible with the A60, ST64, G95 and G125 bulb shapes that guarantee rating of IP65 protection.
The compatibility range is being extended and is currently being tested.

Each Modulair lamp is designed, and assembled in Italy and is tested and CE certified by independent laboratories according to the strictest regulations in force: one more reason for choosing EIVA quality.
