Metal wall or ceiling E27 lamp holder

Finish: Brushed bronze

Description

Compact, essential, contemporary. This E27 lamp holder installs directly on the wall or ceiling, with no need for ceiling roses or additional structures. The solid metal cover, crafted with attention to detail, turns it into a true architectural feature—designed for those who want to integrate light with both subtlety and character.

It's the ideal choice for modern indoor spaces: above a mirror in the entryway, next to the bed as a minimal wall light, or in a neat row along a hallway. Also perfect for contract projects such as cafés, boutiques, and professional studios, where aesthetics and functionality must go hand in hand.

Thanks to the E27 socket, the lamp holder offers maximum freedom: it's compatible with the most common bulbs, allowing you to change style and atmosphere whenever you like.
